

The ChromaVan extends a delightful invitation to small groups to enjoy a soothing light and colour experience and have a personalised colour reading.

Using innovative lighting technology in a unique exploration of colour perception all housed in the comfort of a re-modelled caravan.

Come soak in pure colour, feel how it affects your body, and discover how colour shapes your life.

This from Hastings Coastal Currents Festival, 2007:

'Hardened cynics, hard to please teenagers, hard at work production crews and children of all ages; every single one of them came out of the Chroma-van glowing and smiling. We could have done with a dozen Chroma-vans to fill the need as word spread. Not only a joy to the soul but scarily accurate in its portrait of nearly everyone who entered its white womb like interior. Loved it, will be getting you back for more next year.'

Impossible theatre

Combining innovation with involvement we create innovative participatory, installation, digital and live arts events which intrigue and involve people from many different backgrounds.

We produce work in a wide range of formats, working with a pool of talented artists in a wide range of contexts, offering fresh perspectives on life, helping to develop an active culture.
