Technical Requirements

Darkness: needed to work - usually 30-60 minutes after sunset.
Best in unlit locations, with no streetlights or direct lighting.

Power: 2 x 16 Amp sockets with C-form connectors.
If generator fed it should be suitable for electronic equipment.

Footprint: The Lightweight globe is about 4.5m in all dimensions.
The nearby 3m Gazebo is flexible in its location, and can be replaced with a parasol in tight spots.

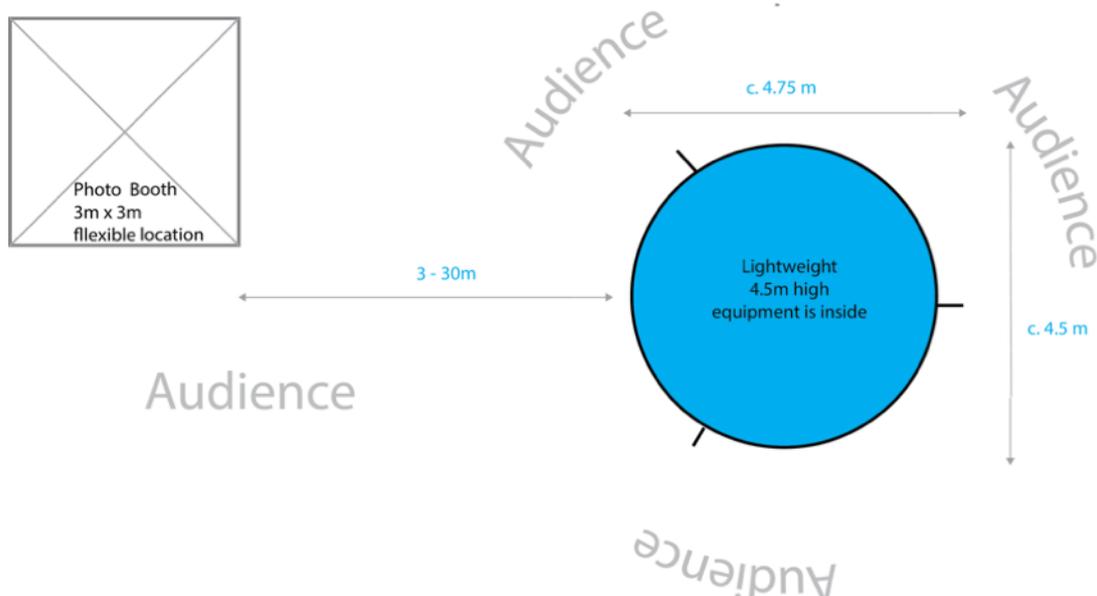

Space: also needed for audience to gather, and watch.

Crew: self-contained - 2 crew will set up our own equipment,
approx 4 hours required, and 1.5 hours to de-rig.

Access: for our VW Transporter van registration number YG57 OET
for the duration of the set up, with nearby parking for access to storage.

Stewards: usually needed for audience management.

Continuous Operation: engages audience over the whole evening.
Simple, flexible. Few burdens on the promotor.

LightWeight

Mesmerising Participatory Lightshow

audiences become animated creatures spinning around the globe

A 4-metre diameter inflated sphere sits on a 3m diameter metal frame with three adjustable height legs.

It works on uneven ground, grass or even indoors given enough room and a blackout.

Our nearby outdoor photography station features a face-recognition camera that sends images to the globe wirelessly.

2 x 16amp sockets preferred, but its possible to run off a single 13amp domestic socket (approx 11amps drawn). We need power at the globe and our nearby camera station.

The piece can run all evening, or be timed to suit your requirements.

£5m public liability carried. Risk Assessment / Operational Plan supplied.

Content

Unique: We bring an entrancing range of video, animation and visual effects with bespoke music all programmed in a captivating presentation.

Interactive: Highly engaging and inviting participation. Audiences faces are captured and rapidly mapped into live animations that spin around the globe - creative, playful and interactive.

Bespoke: This creative public showcase is able to present new video, images or sounds - let us develop new material around your theme.
